

WebEx Receives 2005 Frost and Sullivan Market Leadership Award For Web Conferencing

SANTA CLARA, Calif., June 20, 2005—Research firm Frost & Sullivan has awarded WebEx Communications (Nasdaq: WEBX) the prestigious 2005 Market Leadership Award for continued success within the web conferencing industry.

In its recently released market report, Frost & Sullivan praised WebEx for its leading market share, revenues, installed base, profitability, solution offerings, and customer mind share. According to the report, WebEx has 64.4 percent of the worldwide web conferencing services market, more than three times its nearest competitor.

“WebEx has redefined the market and pushed adoption by constantly striving for high functionality, reliability, security, and enhanced value for its offerings,” stated Roopam Jain, Frost & Sullivan industry analyst. “WebEx has expanded beyond web conferencing to offer not just a technology solution, but also a range of specialized applications that solve specific business problems and enable business processes by looking at the entire workflow of applications.”

The Frost & Sullivan Market Leadership Award is given each year to the company that has exhibited market leadership through successful implementation of a defined and focused business strategy. To choose the recipient of this award, Frost & Sullivan analysts track revenues and market shares, hold interviews with all market participants and conduct extensive secondary research of proprietary data sources. The Market Leadership Award is then given to the company that has excelled across all categories.

WebEx manages a global network over which it delivers a suite of real-time collaboration applications including services for web conferencing, web-based support, remote training and online events. These applications help businesses accelerate the sales cycle, increase revenue, improve employee productivity, speed products to market, enhance customer satisfaction and decrease training and travel costs. All of WebEx’s services are built on the MediaTone™ communications platform and delivered through the WebEx MediaTone Network, the only global network specifically designed for real-time web collaboration. WebEx also provides a worldwide network of certified WebEx specialists to help companies maximize return from these applications.
